# Facial Waxing

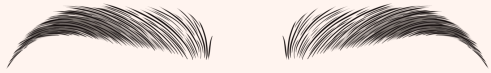

## THE BENEFITS...

**Long-lasting results:** Unlike shaving or hair removal creams, waxing removes hair from the root. This means that it takes longer for the hair to grow back, and you can enjoy smooth skin for several weeks.

**Exfoliation:** Waxing not only removes hair, but it also exfoliates the skin. The wax adheres to the dead skin cells and pulls them away, leaving the skin smooth and soft.

**Precision:** Waxing allows for precise hair removal, making it a great option for shaping eyebrows or removing hair from the upper lip or chin.

**Thinner hair growth:** With regular waxing, you may notice that the hair that grows back is thinner and finer. This is because waxing weakens the hair follicles over time, resulting in less hair growth.

# Brow Waxing

## WHAT TO EXPECT DURING YOUR FIRST EYEBROW WAX

**A Slight Ouch:** A little discomfort is completely normal during your first eyebrow waxing. Don't worry, it will gradually hurt less each time you visit.

**A Little Off The Top:** A little pair of trimmers may come out during your appointment to snip some longer hairs.

**A Tweeze Here & There:** After waxing, your wax specialist may tweeze your brows to perfection by removing pesky strays.

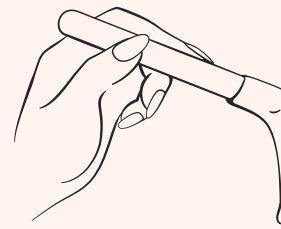

**Slight Red:** The skin around your brows may become red after waxing. To play it safe, we recommend waxing about three days before any event!

# The Perfect Brows

## BROW LAMINATION AND TINTING

**Lamination:** This is a process that involves setting the brow hairs in a specific direction using a chemical solution. The solution is applied to the eyebrows, and then the hairs are brushed and fixed in place with a setting lotion. This technique gives the eyebrows a fuller, more defined look by smoothing out any unruly hairs and creating a uniform shape.

**Tinting:** This service involves applying a semi-permanent dye to the eyebrows to enhance their color and shape. The dye is typically made of vegetable-based ingredients and is applied to the eyebrows using a brush. The dye is left on for a few minutes, and then it is wiped off, resulting in a more defined and fuller-looking eyebrow.

# Bikini Waxing

Getting your bikini area waxed by a professional can truly be a "Treat Yourself" moment. Most ladies find themselves more pleased with the results of waxing as opposed to other temporary hair removal options like shaving, epilation, and hair removal creams.

## THE BENEFITS...

**Long Lasting Results:** Bikini waxing removes hair from the roots, which means it takes longer for the hair to grow back. This means that you can enjoy smooth, hair-free skin for several weeks before needing to wax again.

**Skin Health:** Shaving can cause ingrown hairs, which can be painful. Bikini waxing can help reduce the occurrence of ingrown hairs as it removes hair from the root. Waxing this area can also help improve personal hygiene as it removes hair from the pubic area, which can trap sweat and bacteria. With less hair, it is easier to keep the area clean and reduce the risk of infections.

**Minimal Irritation:** Shaving can cause skin irritation, razor burn, and itchiness. Bikini waxing, however, is less likely to cause irritation as it removes hair from the root, leaving behind smooth skin.

**Thinner & Finer Hair:** When your hair does grow back after waxing, it will grow back weaker, making it finer, softer and sparser.

# Bikini or Brazilian?

## WHICH IS WHICH?

You may have heard the terms "Bikini" and "Brazilian" used interchangeably, and that can be confusing when picking which service is right for you. But don't worry, we're here to clear things up! We define our three services as "Bikini Line", "Bikini Full", and "Brazilian".

**Bikini Line:** This is a basic tidying. Your specialist will wax the sides (also known as the panty line) and across the top. Imagine you are wearing bikini bottoms, it prevents hairs from "peeking out"

**Bikini Full:** This is the next step further after a bikini line wax. This wax allows you to take off as much or as little from the top and sides. Many clients will leave a small strip, triangle, or nothing at all. This is fully up to your preference!

**Brazilian:** This wax goes from the front, all the way to the back with an added butt strip. This is perfect for a completely nude look. You may also leave a small strip with this wax.
